

Elijah Vazquez

Software Engineer • elijahvazquez.dev

PROFILE

Experienced web developer crafting intuitive & beautiful user experiences. Proven proficiency in bringing designs to life within deadlines.

EXPERIENCE

Full Stack Developer, SDE-I, BoxedUp, Remote — Mar 2024 - Present

Fast-paced startup with multiple web applications and a small, hungry team wearing multiple hats

- Hired to expand the full-stack team and develop a new sales feature on a Rails-powered RMS & e-commerce platform built primarily for rental services
- End-to-end feature ownership: Translating Word docs into tech specs, prototyping UIs in Figma, designing server-side data storage & schemas, integrating responsive front-ends, and automated testing
- Own production health monitoring, triaging bugs or outages, troubleshooting, and ensure swift incident response when on-call

Software Engineer, ClickFunnels, Remote — Apr 2018 - Feb 2024

Served as a primary UI developer for ClickFunnels over the past six years

- Migrated a legacy Bootstrap/inline-style front-end into a documented Semantic UI framework
- Rebuilt monolithic Rails app with Turbo, Stimulus, Tailwind, and Bullet Train; championed reusable components and dev docs for a consistent multi-developer workflow
- Leveraged company-sponsored Ruby on Rails training to evolve from UI specialist into a full-stack engineer, cutting context switches and independently owning front-end and back-end features

Front-End and Interactive Developer (Contracts)

PrizeLogic and Lavidge, Phoenix, AZ — Aug 2017 – Apr 2018

- Modernized sweepstakes platforms by moving from separate mobile and desktop builds to a unified responsive design and automated HTML email generation via a Gulp pipeline
- Delivered custom UIs in Umbraco CMS under tight time constraints, extending an initial two-week engagement into a four-month project and streamlining template creation

Front-End Developer, Sagepath, Atlanta, GA — Feb 2015 - Aug 2017

Hired as a junior developer, quickly exposed to a number of technologies, and rose through the ranks in my short but formative years here

- Originally tasked with weekly website updates, automated much of the process (Photoshop presets, HTML templates) saving hours in weekly dev work
- Built a WordPress website with lightly customized theme on a pro bono basis for a local charity
- Led front-end development of a CMS-driven website (Umbraco, ASP.NET) for a government agency. This public-facing platform educated users about historical events and promotes core values like courage, sacrifice, and integrity

EDUCATION

University of Central Florida, Bachelors of Arts in Digital Media and Design, 2014

Valencia College, Associates of Art and Science, 2012

EXPERTISE

I like the puzzle of debugging and the creativity of new features, but I'm most alive when the work centers around people. From UX and DX to the flow of a team, I build with empathy and clarity in mind.
